

Diagnosed with Lung Cancer?

THE BEST TECHNOLOGY - RIGHT HERE - RIGHT NOW

“One Of The Most Significant Advancements In The History Of Cancer Treatment”

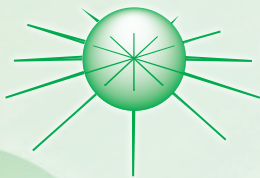

CYBERKNIFE® is a truly remarkable, non-invasive approach to treating lung cancer and other malignant or benign tumors - even tumors that were previously inoperable. Delivering highly focused beams of radiation directly to tumors with sub-millimeter accuracy, CYBERKNIFE® is able to destroy lung tumors without making a single incision.

THE CYBERKNIFE® SYSTEM is the most accurate Robotic Stereotactic Radiosurgery device in the world, available right here in San Diego. CYBERKNIFE® RADIOSURGERY is done on an outpatient basis and allows patients to resume their daily routine immediately after treatment with:

- No Hospitalization
- No Incisions
- No Anesthesia
- No Blood Loss
- Less Pain
- No Recovery Time
- Complete Treatment in 3 to 5 Days
- Two Convenient Treatment Locations

Call CYBERKNIFE CENTERS of SAN DIEGO today to schedule a private consultation.
